

Auburn City Schools 21st Century Learning Initiative

Goal #3--Create and support equitable opportunities for student learning through the use of technology as an extension of the classroom

Objectives 1-Students will know how to properly use the technology as an extension of the classroom

Activities that help achieve the objective and realize the outcome	Inputs that help achieve the objective and realize the outcome	Data	Measurement	Outcome [What was accomplished]	Time Line
Make available technology training on hardware, software, and peripherals for those that need it		Results of testing and assesment of skills and knowledge	95% of students demonstrate competence in using the technology as an extension of the classroom		
Delivery of training on search, information and data gathering methods and strategies; organization and ethical use of electronic resources;		Student survey			
Including the ability to use the technology as applied in the curricular area as part of the students grade					

Objective 2-The school system will achieve a one to one student computing ratio beyond the classroom for grades 9 through 12

		The number of computers and students	1 computer for each student		
--	--	--------------------------------------	-----------------------------	--	--

Objective 3-Ensure all students in grades 9 through 12 acquire Internet access from home

		Survey of parents	100% of students in grades 9-12 have access to the Internet at home
