Online Safety Tips

intel

1
Set up parental controls through your internet provider and on the device's operating system.

2
Teach your kids the value of strong passwords and to not share them with anyone except you.

3
Be aware. Don't allow your child to use Private or Incognito modes.

4
Make sure that each child has their own profile on shared computers. Check browser histories to ensure safe use.

5
Keep your kids in public areas when using devices.

6
Collect all devices at night and charge them in your bedroom.

7
Set clear expectations: let your children know you will be checking their online activities.

8
Disconnect. Set screen-free times during the day.

9
Do not download files from an unknown person. Sometimes a phishing attack will involve a file being downloaded to your computer.
