

# Real-Time Translation

## Accelerating Learning for Students through Translation

How Microsoft\* education solutions compare to Google\* in offering real-time translations for students.

### Microsoft PowerPoint Present Live Translations Support

Students select their preferred language

Multiple languages in the same class

Over 50 languages

With only two clicks, teachers can launch a presentation in Present Live so that students can access the presentation in their preferred language

#### Microsoft PowerPoint Present Live Experience

- Built within web version of PowerPoint
- Real-time captions available in over 50 languages
- Works on laptops or mobile devices in single view on single device
- Students access presentation through link or QR code

#### Google Slides Experience

- Requires using multiple tools and windows
- Real-time captions available in English only
- Requires multiple devices or apps in multiple views
- Students access presentation through link

Microsoft PowerPoint Present Live allows the approximately 5 million students in ELL programs to translate presentations in their preferred language.

Given its simplicity and number of languages available for students, PowerPoint Present Live is a better choice than Google options for customized real-time translation in presentations.
