

## Microsoft Teams for Education Prioritizing and Supporting Student Well-being

How Microsoft Teams for Education\* solutions compare with Google Workspace for Education\* in supporting student well-being.

Social and Emotional Learning (SEL) in Microsoft Teams for Education

Reflect has built-in social, emotional, and academic learning reflection prompts

Feelings Monster illustrations bring emotions to life

Insights analyzes and displays student, class, and school SEL trends.

Students can express their social, emotional, and academic reflections in **three clicks**.

### Microsoft 365 Education

Suggested solution uses Teams for Education, a single platform

15 built-in SEL reflective question prompts

The Feelings Monster has over 50 illustrated emotions to help develop emotional granularity

Insights provides AI-driven data analysis

### Google Workspace for Education

Suggested solution<sup>1</sup> requires four distinct Google tools

No built-in questions

No visual representation

Displays responses in Forms or Sheets

Reflect in Microsoft Teams for Education provides students a supportive and fun outlet for understanding and expressing their feelings, reflecting on their academic success, and developing empathy for others.

Providing built-in support resources that fully integrate within the Teams for Education platform, Microsoft's SEL offering is a more comprehensive experience that helps students grow and provides schools with data that can help better identify and address needs at scale.
