

Microsoft OneNote Live Captions Inclusively Designed Digital Notetaking

How Microsoft OneNote* Live Captions compare with Google Keep* and Translate* in supporting accessible notetaking.

Inclusive Design in Microsoft OneNote Live Captions

Translate into over 100 languages and dialects

Highlight and pause controls for captions

Generate captions alongside student notetaking space

Empower students with agency and autonomy to **transcribe verbal instruction** within their inclusively designed class notebook.

OneNote Live Captions

Google Keep and Translate

Transcribed captions, class content, and notes all within a single platform

Translations, class content, and notes each exist in separate tools meaning more tabs and windows

Translate into over 100 built-in languages and dialects

Keep has zero built-in translation languages or dialects

Translations are automatically saved for students

Translations need to be transferred into a separate tool by the student

Students can pause translations in real-time

Translations cannot be paused

OneNote Live Captions gives students a universally designed transcription and translation tool that helps all learners better access, engage with, and simplify the notetaking process.

Given the simplicity of using a single, inclusively designed platform for digital learning, Microsoft OneNote Live Captions provides a superior transcription and translation experience for learners than the equivalent process using Google solutions.
