A Collection of District Technology Resources

As technology has evolved and districts move forward with innovative technology implementation plans. Resources have evolved. Depending on a district's goals and missions you will find either a standalone technology plan or see technology woven through a district's strategic plan. The following is a collection of technology related resources from school districts across the United States.

Austin Independent School District

Austin, Texas

https://www.austinisd.org/technology

Austin ISD has done a nice job curating resources for parents and making them accessible online in both English and Spanish. The District's technology plan is good through 2017 and there is alignment with technology supporting the overall strategic plan of the district through 2020.

Baltimore County Public Schools

Towson, Maryland

http://www.bcps.org/academics/stat/

Baltimore County Public Schools is known for their successful one to one initiative or STAT: Students and Teachers Accessing Tomorrow. From their roadmap to their policies learn how this district built a strong program and expanded.

Clare-Gladwin Regional Education Service District

Claire, Michigan

http://cgresd.net/domain/46

Provides technology services in consortium to five rural Michigan School Districts. The Technology Plan and Policy resources demonstrate how smaller districts can work together to have a common focus.

Nevada Ready 21

Nevada Department of Education

http://www.doe.nv.gov/Boards_Commissions_Councils/Commission_on_EdTech

The Nevada Ready 21 plan is a state wide technology plan designed to transform education through effective use of technology to create a personalized and learner-centered approach to education. More information about the details on the implementation of the plan can be found at: http://nr21.ctl.net
