

Windows 11* Offline Access

Accelerating Learning for Students through Offline Access

How Microsoft* education solutions compare to Google* in offering offline access to educational materials and creation tools for students.

Offline Access in Windows 11 Supports

Students select the files and folders

Changes made offline automatically update when reconnected to network

Desktop apps and their accessibility and translation features

Students can set up offline access to files or folders in OneDrive* **in 22% less time.**

Offline Microsoft Windows Experience

✔ OneDrive* is built within Windows 11

✔ Accessibility tools built into offline Microsoft Word, PowerPoint and more

✔ Translation tools built into offline Microsoft Word, PowerPoint, and more

✔ Full desktop tools like the Adobe suite or CAD software available offline

Google Chromebook Experience

✘ Offline file access requires adding an extension and turning on Google Drive* setting

✘ No built-in accessibility tools online or offline

✘ No translation tools offline

✘ Relies upon limited Android* app versions

Microsoft Windows 11 allows the approximately **12 million students¹** in the U.S. without internet access the ability to learn offline.

Given the simplicity of syncing files and the availability of desktop tools, Windows 11 is a better choice than Google Chrome OS options for offline access and providing equitable learning experiences.
